

I urge you to stop Sinclair Broadcasting's from forcing their stations to air an anti-Kerry documentary days before the election. I consider it unethical and in my opinion protection from media moguls like this, is the FCC is even around. Please stop this injustice from happening.

If you must allow this to air, you must insist it be offset the same evening, by the airing of a counter program like "Going Upriver" to balance the presentation.

In closing, I am much more concerned about a media company trying to exert influence on the Presidential election than I am with a brief glimpse of a performers partially covered breast. I do hope you give the same amount of attention to this as you did to Janet Jackson's Superbowl flash.

Thank you,  
Gene Brake
